SUMMARY

Software engineer with a strong passion for technology and backend development. Focused on building scalable systems that meet the high reliability and performance standards required by the finance and banking sectors. Shaping competencies around designing the core architecture of large-scale applications, with a deep commitment to continuous learning, skill development, and delivering innovative technological solutions.

EDUCATION & TRAINING

Çukurova University - Computer Engineering

2021 - Present Computer Engineering (4th Year Student)

Sabri Ülker Anadolu High School

High School Graduate (Ranked 1st in Graduating Class) | 2017 - 2021

TECHNICAL SKILLS

- **Programming Languages:** C#, Python, C, C++, JavaScript, HTML, CSS
- **Backend & Frameworks:** ASP.NET Core Web API, Entity Framework (EF) Core, RESTful APIs, Flask
- **Databases:** MS SQL Server, Redis, PostgreSQL, MongoDB
- **Data Science & AI Tools:** Pandas, NumPy, Plotly, Streamlit
- **Tools & Platforms:** Git, GitHub, Docker, Postman, Microsoft Office, Cisco Packet Tracer
- **Core Competencies:** Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Data Structures & Algorithms, Agile/ Scrum Methodologies, Network Fundamentals
- **Currently Focusing On:** Specializing in advanced backend development and integrating Large Language Models (LLMs) & AI capabilities into backend architectures.

WORK EXPERIENCE

Creative Ayakkabıcılık Sanayi ve Dış Ticaret – Customer Relations Specialist

Period: September 2021 - September 2025

- Managed financial data tracking, payment collections, and post-sales client relations. Successfully handled the reconciliation and collection of 33,000,000 TL, demonstrating strong accountability and precision in high-volume financial operations.

1.5 Adana UVA Team, Adana - Student Software Engineer

Period: March 2022 - May 2022

- Developed computer vision modules for object detection and mapping using Python and OpenCV.

Cukurova Ate Team, Adana - Student Software Engineer

Period: March 2025 - September 2025

- I actively led the software unit as a team captain, contributing to web development and R&D processes. I combined my engineering skills with teamwork to develop sustainable and innovative solutions.

1.5 Formula Student Team, Adana - Sponsorship Subteam Lead

Period: July 2025 - August 2025

- Collaborated with other functional teams to manage sponsor relations, prepare compelling sponsorship proposals, and secure funding for team projects. Enhanced my communication and leadership skills through strategic outreach and partnership development.

Buhari Dijital Teknolojiler - Software Development Intern

Period: July 2025 - August 2025

- Developed a live match score service that fetches real-time sports data via API, stores it in Redis database, and serves it with a Flask API. Implemented Docker & Docker Compose setup to containerize both the data-fetcher and API services, ensuring easy deployment and scalability.
- Integrated Swagger for API documentation and interface testing. Ensured reliable data flow and uptime by coordinating Redis storage and periodic data-fetch routines.

PROJECTS

Match Scores Project - [[Github link](#)]

Project Description: A project designed in a microservice architecture mindset that fetches live match data from an external sports API, stores it in Redis, and serves real-time score information in JSON format through a Flask-based HTTP API at the “/scores” endpoint.

Technologies Used: Python, Flask, Redis, Docker, Git & GitHub

Mockingbird Web Project - [[Github link](#)]

Project Description: I aimed to create a simple web project to provide ideas for couples on special occasions. Users can see an image and animated hearts while music plays.

Technologies Used: HTML, CSS, JavaScript, Flexbox, Responsive Design

DataVis Dashboard Project - [[Github link](#)]

Project Description: Collaborated in a 3-person team to develop an e-commerce dashboard using Streamlit. I designed the app architecture, implemented dynamic filtering logic, and created interactive Plotly visualizations to analyze customer behavior and sales trends.

Technologies Used: Python, Streamlit, Pandas, Plotly, Git & GitHub

SOFT SKILLS

- **Leadership & Teamwork:** Proven ability to guide teams toward project goals while fostering a collaborative environment.
 - **Analytical Problem-Solving:** Adept at thoroughly analyzing complex issues to identify and implement effective solutions.
 - **Time Management:** Highly organized with a strong track record of delivering tasks efficiently and on schedule.
 - **Adaptability & Continuous Learning:** Passionate about exploring innovative technologies and quickly adapting to new challenges.
 - **Effective Communication:** Strong interpersonal skills, ensuring clear and harmonious cross-functional collaboration.
-

ADDITIONAL INFORMATION

- **Languages:** Turkish (Native), English (Upper Intermediate - B2)
 - **Driver's License:** Class B
 - **Military Status:** Deferred until 2030
